ISO-Designer

Create professional masks easily | ISO-11783-compliant

All ISO | All compliant | All clear

With the ISO-Designer from Jetter AG, it is simple to create ISOBUS-compliant files. ISO-Designer commands a high-performance graphical editor with a functional scope comparable to graphic programs. Many actions can easily be executed by a few mouse clicks.

The highlights at a glance:

- Creating masks to ISO 11783 (.iop files)
- Graphics editor
- Convenient aligning/grouping
- Operating by drag-and-drop
- Zoom function
- Undo/redo function
- Configurable GUI
- Smart copy function
- Object pool with preview function
- Library
- Bookmarks and history
- Support for all standard levels
- Automatic color conversion
- Preview function
- Multilingualism can be implemented simply

For every ISOBUS terminal

Clearly designed project management | 100 % ISO-compliant

Optimum project management is achieved by presenting the objects in a clear tree structure with a preview function. The ISO-Designer supports all specified levels of the standard. When you create a new project, you are free to choose which specifications should apply. The automatic color space conversion of imported images always ensures compliance with the ISO standard.

Everything at a glance

Ease of operation leaves no wish unfulfilled

Profit from numerous convenient functions which ease your daily work. This way, even the work interface can be customized to your individual needs. All functions first go through an intensive practical test before they are finally integrated into the program.

Optimized for the practice

Multilingualism | More options

With the ISO-Designer, multilingual masks are especially simple to create. A resource file saves all the necessary information. The relevant texts are displayed depending on the active language. The resource file can also be exported as a table and imported again, which substantially simplifies external translation of the texts.

Fast, efficient language management
