1 New features

Below, all features that are new in this version, as well as the enhancements are listed.

1.1 Objects

1.1.1 Property “Comment” has been added to all objects of the object pool and to mask objects

For all objects a multiline text for information purposes can be entered into Object/Comment in the Properties pane. Then, the tooltip will display this text in the project tree, and object pool tree. The preview pane has also been modified.
2 Fixed software bugs

This chapter describes the software bugs which have been fixed in the new software release.

2.1 Objects

2.1.1 Size of a data mask

Changes made to the size of a data mask had an effect only in direction X.

2.1.2 Size of non-square images in *.c file

Non-square images caused scaling problems. ISO-Designer failed to write the original size of the images to the *.c file.

2.2 General issues

2.2.1 Windows® platform: Problems with text size > 100%

If the text size in Windows® was set to a value greater than 100%, the text and various controls were displayed incorrectly on the user interface.
