Versions-Update Übersicht			
Version	Funktion	erweitert	korrigiert
V3.2.2	<p>ID# 1023: JetViewSoft If the zoom factor of a mask was not equal to 100%, it was not clear why the Grid object could not be switched to UserMode. It now appears a hint.</p> <p>ID# 1215: JetViewSoft Changing the font size of a cell in the grid object has not been accepted sometimes.</p> <p>ID# 1239: JetViewSoft If a user configured for an IO-dynamic only one of the two limits min/max, so at runtime there appeared a wrong message.</p> <p>ID# 1242: JetViewSoft With older projects (before version 3.x), it could happened, that the LED-Driver wasn't configured correctly and the lights were not activated by the driver.</p> <p>ID# 1243: JetViewSoft The deployment has always transferred all files from the output directory on the JetView display, although the download of non-modified files (e.g. images) was not necessary.</p> <p>ID# 1250: JetViewSoft (ER-STX-Platform) The compiler has been created an invalid build result after multiple compilation of the same project. In this case there were some tags, which were not refreshed even if the Active property was set to TRUE.</p> <p>ID# 1257: JetViewSoft In MeterEx object negative values of the property MinValue led to a bad sector representation. A bug has also occurred when the values for the property SectorValue were not assigned in ascending order.</p> <p>ID# 1259: JVER The usability of the user management at run time has been improved.</p> <p>ID# 1260: JetViewSoft If a user has changed the parameter SenderID of the macro command CallSTXFunktion to the type long, so this triggered an unacceptable error.</p>		<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

Overview of Version Updates			
Version	Function	New	Fixed
V3.2.2	<p>ID# 1261: JetViewSoft If an object was inserted into the objectpool by using copy/paste and the user canceled the operation by clicking on the X button in the following dialog, the program has been crashed.</p> <p>ID# 1262: JetViewSoft When converting from projects that have been created with a program version 2.x, there were not converted all the dynamics.</p> <p>ID# 1264: JetViewSoft The position of a pointer in a group that was referred to via pointers has been misrepresented. This also resulted to an incorrect representation in the component editor.</p> <p>ID# 1265: JetViewSoft If a user inserted a JetTagDB entry of type array which contains a struct into a communication- service, so it was not stored correctly. Some tags were stored with an invalid value for the Active property. This has meant that some tags were not updated at runtime.</p> <p>ID# 1267: JetViewSoft Tags, which were inserted from the JetTagDB-window and which referenced a register-bit, did not work correctly. This tag was update from the whole Register only.</p> <p>ID# 1269: JetViewSoft After adding an event to a grid-object, the project was not able to load anymore.</p> <p>ID# 1270: JetViewSoft With the F2 key in previous versions it was possible to start editing the object name. In version 3.2.1 this key was assigned to the navigation through bookmarks. The assignment has been corrected. It is now again possible to change the object name with F2.</p> <p>ID# 1272: JetViewSoft The shortcut keys ALT +0 ALT +8 ... did not always work correctly. These shortcuts can be used for toggling the appearance of the docking windows.</p>		<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

Overview of Version Updates			
Version	Function	New	Fixed
V3.2.2	<p>ID# 1274: JetViewSoft (ER-STX(S)-Platform) The compiler didn't create the interface file VisualInterface.stxp for the platform ER-STX(S).</p> <p>ID# 1277: JetViewSoft Typing a character into the search window of JetTagDB causes an immediately lost the input focus. Further character could not be entered.</p> <p>ID# 1279: JetViewSoft The message window, which indicates that a JetTagDB-file has changed was displayed, although JetViewSoft was not the foreground application</p> <p>ID# 1281: JetViewSoft If a user changed the filter in the load workspace dialog to *.* and then he selected an image file, so this led to a program crash.</p> <p>ID# 1282: JetViewSoft For the platform STX-PC/CE the objects Meter, MeterEx, Edit und Checkbox have shown an invalid entry NumberVariable in the property window, if these objects were part of a group.</p> <p>ID# 1287: JetViewSoft A conversion of projects version 2.x created some invalid links to previous contained HTML-projects.</p> <p>ID# 1289: JetViewSoft If a user has added new displays to a project, after a reload of the project there has been appeared some additional invalid items below the controller node.</p> <p>ID# 1299: JetViewSoft If a user configured a cell of the grid-object with an input dialog, the property grid was displaying the new setting not until leaving and reselecting the cell.</p> <p>ID# 1301: JetViewSoft If a user has changed the type of grid cell to checkbox and previously there was an input dialog assigned, so it wasn't possible to change the state of the checkbox by mouse click at runtime.</p>		<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

Overview of Version Updates			
Version	Function	New	Fixed
V3.2.2	<p>ID# 1307: JVER The STX-Interpreter of the EmbeddedRuntime (JVER) didn't store the current values of the registers before it has been shutting down.</p> <p>ID# 1309: JetViewSoft An invalid ResourceID was not detected by the compiler as an error. In embedded runtime (JVER) versions prior to 3.2.1.560 an invalid ResourceID in an input dialog results in a program crash.</p> <p>ID# 1311: JetViewSoft The configuration of the font size for the user management window was not deployed to the runtime system (JVER).</p> <p>ID# 1315: JetViewSoft If a user opened a project with a doubleclick on a *.jvp project-file, so the AutoRecovery-function was not able to restore a damaged project-file with a previous saved *.bak file.</p> <p>ID# 1318: JetViewSoft The JetTagDB-Server was not creating correctly the addresses of string Register for STX-projects. For example an array of string [8] wasn't created with a register offset of 4, but with an invalid register offset of 3.</p> <p>ID# 1322: JetViewSoft An activated option "Enable flashing images" under Tools/Options/Format had no effect.</p> <p>ID# 1325: JetViewSoft A running build process could not be interrupted immediately. It could take a long time until the system reacted to it.</p> <p>ID# 1327: JetViewSoft (ER-STX-Plattform) Was a Move-Dynamic configured just with one tag (horizontal or vertical), so the runtime system has been used a zero position for the other tag. This has been resulted in a movement only at the top or at the left border of the screen.</p>		<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

Overview of Version Updates			
Version	Function	New	Fixed
	ID# 1330: JetViewSoft The AutoRecovery function was only launched when opening a workspace. In this way it happened, that *. bak files were not created. Now, the start of the AutoRecovery function is already at startup.		✓
