Overview of Version Update			
Version	Function	expanded	corrected
V3.3.1	<p>ID# 2307 Incorrect display mapping for the device simulation JCM620_10.</p> <p>ID# 2308 Some errors with the hotkeys for events were fixed.</p> <p>ID# 2309 Incorrect message when entering values in an edit object.</p> <p>ID# 2314 The data of a grid-object hasn't been updated after a page navigation.</p> <p>ID# 2315 The maximum value for an input number object was limited to 32767.</p> <p>ID# 2316 The spin-button for changing number values within the propertygrid has had some incorrect behavior.</p> <p>ID# 2317 Indirect access to a string register, which configuration came from a TagDB file, was not possible.</p> <p>#ID 2318 A change of type integer to string for Tags, , which configuration came from a TagDB file, was not possible.</p> <p>ID# 2323 During the conversion of a project of type JVER to type JVER-STX the visible properties of all objects were set to "true".</p> <p>ID# 2324 For a conversion from JVER to JVER-STX the converter was not adding a required display, if there wasn't a display in the source project.</p> <p>ID# 2325 The change of the project name in the project tree appears only after reloading the project.</p> <p>ID# 2326 If a user type in an incorrect value for the ObjectID (> 32767) the application couldn't be controlled anymore.</p>		<p>✓</p>

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.1	ID# 2332 From a certain number of objects with dynamic visibility it didn't work anymore.		✓
	ID# 2334 Faulty resource assignment was shown twice by the compiler.		✓
	ID# 2339 FTP download error corrected.		✓
	ID# 2342 The function ResizeToOriginalFormat couldn't be executed, if the picture of an image object has been changed by the user.		✓
	ID# 2343 Errors occurred during an AdvancedCopy operation of a button object.		✓
	ID# 2344 Different font height between runtime and design-time corrected.		✓
	ID# 2346 The visibility dynamics of an edit object was not working correctly.		✓
	ID# 2347 Were projects of STX-S Platforms edited with an Application Version 3.2.2 and after that opened with a later Version, so there occurred error messages about invalid font sizes		✓
	ID# 2350 The assignment of a number-variable to a bargraph was lost, if the variable was deleted and added again by using the undo function.		✓
	ID# 2353 In a converted project (JVER => JVER-STX) duplicate Tag names were not displayed and included documents were also ignored.		✓
ID# 2355 The User-Management didn't work correct at runtime, because only a login as admin or as guest was possible.		✓	

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.1	<p>ID# 2359 If the Tag-Selection was canceled by pressing the ESC-Key, a previous selected tag was wrongly removed within the property grid.</p> <p>ID# 2365 If many error messages occurred during a compiler build, the user wasn't able to control the application anymore.</p> <p>ID# 2374 Under certain circumstances, all commands of a macro were deleted wrongly.</p> <p>ID# 2375 If the properties Min-Value, Max-Value and Target-Value of a bargraph were getting their values from a Tag, the appearance at runtime was incorrect.</p> <p>ID# 2383 If there was entered a search string in the library's SearchFor editbox, a wrongly error message occurred, if there was no according object found.</p>		<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>
