Overview of Version Update			
Version	Function	expanded	corrected
V3.3.2	ID# 96 The data of a grid object's cell is not updated if it has the focus.		✓
	ID# 190 The sorting order of the object selection list can now be configured over "Tools/Options/Property Grid"	✓	✓
	ID# 702 The input field is not updated at a value change if it has the focus, but the editing of a new value has not started.		✓
	ID# 740 Macros, fonts as well as fill/line styles could not be copied within the object pool tree.		✓
	ID# 1031 There is an abnormal behavior with dropdowns and combo boxes when working with two monitors.		✓
	ID# 1238 When loading a screen a combo box object fires the event "OnChange" twice, which is not correct.		✓
	ID# 1252 A Pointer object gets a wrong position, when it was moved over Drag&Drop on a zoomed soft key screen.		✓
	#ID 1254 The macro commands SetLEDState, ShowUserList, ShowUserLevelList do not work.		✓
	ID# 1263 It is not possible to change the type of a tag inserted over the "JetTagDB" window.		✓
	ID# 1275 In the deployment settings the target "File System" parameter was saved as an absolute path. This caused problem when a project was copied to another folder. From now on this parameter is saved as a relative path to the project's folder.		✓
ID# 1295 In a grid object the height of the column's header is not saved.		✓	

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.2	<p>ID# 1347 If a mask is created in a project's subfolder, then the command "Navigate" does not work correctly.</p>		✓
	<p>ID# 2354 The saving of bigger projects created with previous versions and therefore converted takes a tremendous amount of time.</p>		✓
	<p>ID# 2394 The takeover of a new value in an input field with limits and a factor smaller than "1.0" defined is not done correctly.</p>		✓
	<p>ID# 2406 The selection dialog of a SelectInputObject command mistakenly offered input objects, which were deleted already.</p>		✓
	<p>ID# 2417 The conversion from a JetView ER project to a JetView ER STX does not create a workingset object.</p>		✓
	<p>ID# 2419 Changes in communication service documents are not always saved.</p>		✓
	<p>ID# 2420 The user input over a digipot does not consider neither minimum nor maximum limits of an I/O dynamic, if it is configured over a two-dimensional tag array.</p>		✓
	<p>ID# 2423 Project tree files cannot be moved by Drag&Drop</p>		✓
	<p>ID# 2424 Tags with active status "auto" defined in the communication service do not get active even there are specified in a "OnChange" event.</p>		✓
	<p>ID# 2438 Text, combo- and listboxes do not display texts containing the "&" character.</p>		✓
<p>ID# 2441 If an image object is changed by assigning a different picture file, then the path of this file is not saved correctly or is even not saved at all.</p>		✓	

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.2	<p>ID# 2442 If the project setting "EnableEventsDuringOnLoad" is set to "false" then every first "OnChange" event of a mask is suppressed.</p> <p>ID# 2443 If no connection to the controller can be established at the startup of the embedded runtime "JVER", then there are no further successful connection attempts.</p> <p>ID# 2444 The event "OnCommStatusChanged" is never fired</p> <p>ID# 2445 If there are several events with the same name and different attributes, then deleting one event causes the deletion of all others as well.</p> <p>ID# 2451 The simulation starts behind the windows task bar placed on the left edge of the screen.</p> <p>ID# 2456 The property grid does not hold the scrolling position if another object is selected.</p> <p>ID# 2461 The deletion of a "WindowMask" was not done correctly.</p> <p>ID# 2463 With the configuration of JetAlarmService invalid tags could be selected for the parameter "TriggerTag".</p> <p>ID# 2465 The property "BackMode" cannot be altered in "Meter" and "MeterEx" objects.</p> <p>ID# 2468 Even the setting „Copy Image-Files to local Project-Folder“ is deactivated, the pictures of an image lists are copied to the project folder nevertheless.</p> <p>ID# 2469 The compiler shows an error if inside the hardware tree a controller and a display are having the same name</p>		<p>✓</p>

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.2	ID# 2471 Within an "XY-Graph" object the dynamically change color setting does not work neither for the fill color nor for the line color property.		✓
	ID# 2472 If the value of a "ColorChange" dynamic dropped below the lowest limit then color is not set to the original one.		✓
	ID# 2473 The "OnActivePageChange" event of WorkingSets are not always fired.		✓
	ID# 2474 If a tag is addressed to a register bit number unequal zero, then event "OnDataChanged" is not fired at the change of the bit's status.		✓
	ID# 2475 Names of newly created masks are not generated according to the format of the object templates.		✓
	ID# 2476 Inside the grid object a change of the row or column number does not take effect until the exit of UserMode.		✓
	ID# 2485 The alarm services writes to a log file only if parameter "AllowMultibleLogfiles" is set.		✓
	ID# 2486 Alarm service: Placeholders in alarm description only works if the tag's active setting in the communication setting is set to "true"		✓
	ID# 2487 Alarm service: After copying an alarm any changes to the alarm's description text take effect to the copied ones as well.		✓
	ID# 2492 Alarm service: Inside the alarm description any placeholder with a tag addressed shows the current value, not the value as it was at the time the alarm was raised.		✓
	ID# 2498 Alarm service: The log file does not contain the alarm status.		✓
	ID# 2505 The project tree does not show any container object size changes in the component editor.		✓

Overview of Version Update			
Version	Function	expanded	corrected
V3.3.2	ID# 2511 The change of a mask's size also takes effect on this property in the display, so mistakenly all project screens are changed to the new size.		✓
	ID# 2514 After creating a new group its size was not displayed correctly in the project tree.		✓
	ID# 2517 On Platform "JetView-ER (PC)" the relation between mask height and mask width is not adjusted neither to the mask settings nor to the display settings.		✓
	ID# 2523 Umlauts in texts like "OutputString" are not entered as character, but as hexadecimal value in the c-file generated by the compiler.		✓
	ID# 2524 In the object "MeterEx" the line of the arcs are covered partially by the color of the sector.		✓
